

In the specification:

Please amend paragraph [0215] of the specification as follows:

[0215] The results of this study and our previous work (Gallegos, A. et al., Cancer Res., 56:5765-5770, 1996) suggest that the Trx system offers a novel target for agents to promote apoptosis and inhibit tumor growth, as well as to reverse the drug ~~resistance~~ resistance of some cancers. It is interesting, therefore, that some 2-imidazolyl disulfide inhibitors of Trx (Kuperus, M. et al., Proc. Am. Assoc. Cancer Res., 36:426, 1995) have been shown to induce apoptosis in cancer cells (Powis, G. et al., Anticancer Drugs, 7 (Suppl. 3):121-126, 1996) and, in animal studies by intraperitoneal and oral administration, to have antitumor effects (Powis, G. et al., Anticancer Drugs, 7 (Suppl. 3):121-126, 1996).
